SERVOHYD at a Glance

Servo Hydraulic Pouya (SERVOHYD) is a distinguished private company with over 18 years of experience in reverse engineering, designing, manufacturing, and maintaining advanced control mechatronic systems for industries such as aviation, oil and gas, and energy. As one of Iran's pioneering knowledge-based companies, we have developed the expertise and technology to design, manufacture, and test jet engine components domestically.

Building on our extensive experience in repairing and producing jet engine components, we achieved Maintenance Organization Approval (MOA) in 2016 per Iranian Civil Aviation Authority (CAA.IRI) Part-145.

Our state-of-the-art facilities enable us to offer a comprehensive range of services. These services include the inspection, testing, repair, and overhaul of fuel nozzles; fuel control units (FCUs); fuel pumps; control valves (Fuel Flow Divider and Fuel Solenoid Valves); and hydraulic and pneumatic actuators (Interstage Air-Bleed Actuators). Furthermore, SERVOHYD offers its MRO services for avionics components and sensors (such as the EGT Harness Thermocouple and Lead Thermocouple) in addition to major repairs of Lycoming piston engines.

Recently, SERVOHYD has secured the Design Organization Approval (DOA) from the CAA.IR underscores our capability to meet domestic and international airlines' specialized design, repair, and modification requirements. We are also in the process of obtaining the Production Organization Approval (POA) from the CAA.IRI to further enhance our service offerings.

In addition to serving airlines and aircraft repair centers across the nation and the region, SERVOHYD is equally prepared to consider any request for consulting, repairing, and OEM manufacturing of hydraulic, electro-mechanical, electro-hydraulic, mechatronic, and control components and, if necessary, making testers for them.
